

Multi-Cylinder Diesel Engine for Power Generation

This multi-cylinder diesel engine is designed for power generation applications. It features a robust construction with key components such as a radiator, fuel tank, and various filters and pumps.

Overview

High-Performance Diesel Engine

This multi-cylinder diesel engine is engineered for reliable power generation in industrial and commercial applications. Featuring an optimized design, it delivers stable performance with minimized vibration and noise levels, ensuring energy efficiency and long-term durability. Its compact structure and SAE connection facilitate straightforward assembly and integration into various power systems.

Technical Specifications

Model Number	4108BZL
Rated Speed	3000 rpm
Power Output	120 hp

Key Features

Performance Benefits

- Low-speed regulation for stable operation
- Reduced vibration and noise levels
- Energy-saving design
- Compact structure for easy assembly
- SAE connection standard

Application Suitability

Power Generation, Water Pumps, Marine Power
