Product Overview

Designed for Optimal Retail Performance

This multi-deck refrigerated display case is engineered to maximize product visibility and accessibility in retail environments. Featuring a dual-layer air curtain, it significantly enhances energy conservation while maintaining precise cooling capabilities. The unit is designed to accommodate a temperature range of 0°C, making it ideal for chilled goods, while its aesthetic design integrates seamlessly into modern store layouts.

Technical Specifications

Operating Temperature	0 °C
Cooling Technology	Dual-layer air curtain, Active refrigeration

Design & Features

Key Features

- Adjustable shelving system
- Integrated product lighting
- Open-access design for customer convenience
- Energy-efficient cooling architecture

Construction Materials

Glass • Metal • Durable Polymer

Usage

Recommended Applications	Supermarkets, Convenience Stores, Retail Food Establishments
