Product Overview

High-Performance Multi-Directional Reception

This innovative all-in-one antenna solution is designed to provide comprehensive 360-degree coverage for VHF and UHF signals, ensuring reliable reception for televisions and FM radio. Featuring a smart boost system with an integrated adjustment dial, it allows for fine-tuned signal optimization. Its durable, weather-resistant construction makes it suitable for diverse exterior installations, including walls, roofs, balconies, and attics.

Technical Specifications

Signal Processing

Smart Boost System • Adjustment Dial

Coverage Type	Omni-directional (360-degree)
Supported Bands	FM, VHF, UHF
Rotation Capability	180 degrees

Installation & Durability

Compatible Mounting Locations

- Wall
- Roof
- Balcony
- Attic
- Poles/Masts

Weather Protection Features	Anti-rain, Anti-lightning, Anti-UV
