

Multi-Door Household Refrigerator

This household refrigerator features a multi-door design with a bottom freezer compartment. It utilizes intelligent technology, touch screen controls, and multiple temperature zones for optimal food preservation and energy savings.

Product Overview

Versatile Multi-Door Preservation

This multi-door household refrigerator offers advanced four-zone freshness control to cater to different food storage needs, from fresh fish to deep-frozen goods. Featuring intelligent computerized temperature control, users can adjust settings with one-degree precision via an intuitive touch screen. Its modern design incorporates 3D anti-bacteria technology and energy-efficient white LED lighting to ensure a hygienic and cost-effective storage solution for modern homes.
