

Multi-Door Household Refrigerator

This multi-door refrigerator is designed for household use, featuring a top refrigerator compartment, middle drawer, and bottom freezer compartment. It boasts a super thick foam layer for superior insulation and utilizes mute technology for quiet operation.

Product Overview

Professional Cooling Performance

This multi-door refrigerator is engineered for reliable, long-term household use with an impressive 5,000-hour anti-aging test rating. It features a superior insulation system with a super-thick foam layer to maintain optimal temperature control and efficiency. Designed with modern convenience in mind, the unit incorporates advanced quiet operation technology and versatile voltage compatibility for consistent performance across diverse environments.

Technical Specifications

Operating Voltage	187-240V
Anti-aging Test Duration	5000 hours

Design Features

Build Quality	Super-thick foam insulation, Multi-door configuration, Double-wide design
Acoustic Performance	Mute technology with advanced refrigerant infusion
