

Multi-Element VHF/UHF TV Antenna

This multi-element television antenna is designed for receiving over-the-air broadcast signals. It features Yagi-Uda and loop elements for enhanced reception across multiple frequency bands.

Product Overview

High-Performance TV Reception

This multi-element television antenna is professionally engineered to deliver reliable over-the-air broadcast signals. Combining Yagi-Uda and loop element technology, it provides enhanced reception across both VHF and UHF frequency bands. Built with high-quality aluminum and weather-resistant components, this antenna ensures consistent performance and durability in outdoor environments.

Technical Specifications

Design Features

- Combination Yagi-Uda and loop elements
- Rotatable design for signal optimization
- Includes pole mounting bracket
- Weather-resistant construction

Installation

Outdoor • Pole Mount

Supported Frequency Bands

VHF, UHF

Material

Aluminum tubing
