

Multi-Fiber Tight Buffer Communication Cable

This multi-fiber tight buffer cable is designed for communication applications. It features individual tight buffered fibers surrounded by aramid yarn for strength and an outer jacket for protection.

Product Overview

High-Performance Communication Connectivity

This multi-fiber tight buffer cable is engineered for reliable data transmission in both indoor and outdoor environments. It features individual color-coded fibers for simplified identification and termination, supported by a protective outer jacket. The inclusion of aramid yarn reinforcement ensures robust tensile strength and durability for demanding installation requirements.

Construction

Cable Construction

- Individual tight buffered fibers
- Aramid yarn reinforcement
- Protective outer jacket
- Color-coded fiber identification

Application

Suitable Environments	Indoor, Outdoor
Primary Application	Communication and Data Transmission
