

Multi-Function Air Fryer with Digital Controls

This multi-function air fryer features a digital control panel and a temperature range of 50-230 degrees Celsius. It utilizes infrared heat, hot turbo air, and a 360-degree food rotating system for efficient and healthy cooking.

ADDITIONAL IMAGES

Overview

A versatile appliance capable of broiling, grilling, roasting, and more.

Versatile Cooking Solution

This multi-function air fryer utilizes advanced infrared heat, hot turbo air, and a 360-degree food rotating system to deliver fast, even cooking results. With a generous 10L capacity and a 3D visualization window, it allows for easy monitoring of food as it cooks. Designed for health-conscious kitchens, this appliance offers a versatile alternative to traditional frying, enabling oil-free preparation of a wide variety of meals.

Key Features

3D Visualization Window • 360° Rotating System • Non-stick Coating • Dishwasher-safe Parts • Digital Control Panel

Technical Specifications

Digital control panel allows for precise temperature and time settings.

Utilizes hot turbo air and a 360° rotation system for even, crispy results.

Performance Metrics

1300 W

Power Output

10 L

Capacity

60 min

Max Cooking Time

Temperature Control

50-230°C

Voltage

100-240V AC, 50/60Hz

Cooking Capabilities

Includes a comprehensive set of accessories to expand cooking capabilities.

Included Accessories

- Chicken Fork
- Baking Cage
- Tong
- High/Low Rack
