Overview

Professional Multi-Function Cooking Blender

This high-performance cooking blender combines a powerful 24,000 RPM motor with integrated 600W heating technology to handle both cold blending and hot soup preparation. Featuring a durable 1.75L glass jug and 8-inch cold-forged stainless steel blades, it offers 10 pre-programmed cycles for automated precision. Designed with safety in mind, it includes dual safety locks and a non-stick hot plate, making it an ideal versatile solution for modern commercial or high-end residential kitchens.
