

Multi-Function Food Processor

This multi-function food processor is designed for various kitchen tasks. It features multiple speed settings and a range of attachments for different food preparation needs, including chopping, slicing, shredding, and blending.

Overview

Versatile Kitchen Processing Solution

This multi-function food processor is engineered for high-efficiency kitchen preparation, offering capabilities for chopping, slicing, shredding, and blending. Designed with a robust motor and multiple speed settings, it provides the versatility required for various culinary tasks. The unit features a large-capacity processing bowl and a continuous feed tube, ensuring seamless operation for both small and large batches.

Technical Specifications

Safety Mechanisms

- Safety interlocks
- Secure operation design

Core Functions

Chopping, Slicing, Shredding, Blending

Design & Build

Material Quality

Food-grade materials • Durable construction

Included Attachments

- Large-capacity processing bowl
- Continuous feed tube
- Blender jar
