

Multi-Function Milling and Lathe Machine

This multi-purpose machine is designed for a variety of machining operations. It features a sturdy construction with a milling head and a lathe bed mounted on a robust stand.

Overview

Versatile Machining Solution

This multi-function machine combines milling and lathe capabilities into a single, compact unit designed for precision and versatility. Built with a sturdy construction and mounted on a robust stand, it offers reliable performance for a variety of machining tasks. Ideal for small-scale production environments and detailed project work, this machine provides the adjustable components necessary for accurate control.

Technical Specifications

Best For

Small-scale production • Hobbyist projects

Model Identifier	HQ-400
Machine Type	Milling, Lathe, Multi-Function
