

Multi-Functional Emergency Radio with Hand Crank, Solar Panel, and LED Flashlight

This multi-functional emergency device combines a hand crank generator, solar panel, radio, and flashlight into one compact unit. It provides a reliable source of power and light during emergencies or outdoor activities.

Overview

Versatile Emergency Preparedness

This multi-functional emergency radio is a comprehensive solution designed for disaster readiness and outdoor adventure. It integrates a reliable hand crank generator and solar panel for versatile power sourcing, ensuring functionality during power outages. Equipped with AM/FM/weather band reception and a high-intensity LED flashlight, it keeps users informed and visible in critical situations.
