

Multi-Functional Tire Installation Machine

This multi-functional tire installation machine is designed for efficient and precise tire servicing. Its robust build includes a central mounting column, pneumatic controls, and adjustable tool heads for various tire sizes.

Overview

Professional Tire Servicing Solution

This multi-functional tire installation machine is engineered for efficient and precise tire maintenance in professional automotive environments. Featuring a robust construction with a central mounting column and pneumatic controls, it offers reliable performance for a wide range of tire sizes. The integrated pressure monitoring and intuitive pedal-operated controls ensure operational ease and safety for technicians.

Technical Specifications

Key Features

- Robust central mounting column
- Pneumatic control system
- Adjustable tool heads for versatile tire sizing
- Integrated pressure gauge for inflation monitoring
- Foot pedal operation

Operation Type

Pneumatic • Manual Control

Application

Automotive, Tire Service, Professional Workshop
