Machine Overview

High-Efficiency Multi-Lane Packaging

This automatic, multi-lane packaging machine is engineered for high-speed production of specialized, uniquely shaped pouches. Featuring a durable, stainless steel construction and modular design, it offers both reliability and easy maintenance for industrial environments. The system integrates precise filling mechanisms with advanced controls to ensure consistent output across a wide range of product types and packaging materials.

Technical Capabilities

Filling System

- Multi-lane simultaneous filling
- Adjustable filling volumes
- Automatic film feeding
- Precise sealing mechanism

Design & Safety

Safety Features

Emergency Stop, Safety Guards, Stainless Steel Construction

Applications

Suitable Product Types

- Glucose Syrup
- Coffee Creamer
- Tea Essence
- Liquid/Viscous Food Products
