

Multi-Layer Induction Steamer

This multi-layer steamer is designed for induction cookers, allowing for steaming multiple foods at once. It features a high-capacity design and is constructed with food-grade materials for healthy meal preparation.

Product Overview

Professional Induction Steamer

This multi-layer induction steamer is engineered for high-efficiency cooking, allowing users to steam various food items simultaneously. Designed specifically for induction cookers, the unit features a high-capacity build that supports large-scale food preparation while maintaining energy efficiency. Constructed from high-quality, food-grade materials, it ensures safe cooking and is designed for easy cleaning and maintenance.

Technical Specifications

Model Number	SC-20B7
Compatibility	Induction Cooker

Key Features

Design Highlights

- Multi-layer stacking capability
- High-capacity design
- Energy-efficient operation
- Food-grade material construction

Cooking Benefits

Healthy Cooking • Easy to Clean • Simultaneous Steaming
