

Multi-Lead Shielded Power Cord

This is a multi-lead power cord designed for secure power transmission. It features color-coded connectors and a shielded cable.

Product Overview

Professional Multi-Lead Shielded Power Solution

This multi-lead shielded power cord is engineered for secure and reliable power transmission in sensitive electronic devices. Featuring a robust grey shielded cable design, it ensures minimal interference and consistent performance. The assembly includes four distinct color-coded connectors, facilitating precise and safe installation for complex electronic configurations.

Technical Specifications

Connector Configuration

- 4-lead configuration
- Color-coded connectors (White, Red, Black, White)
- Shielded cable construction

Application

Electronic Devices • Power Transmission

Cable Features

Shielded, Multi-lead, Electronic grade
