Product Overview

Robust Multi-Leaf Suspension System

This 2-axle casting type suspension system is engineered specifically for heavy-duty truck and trailer applications. Featuring a high-capacity multi-leaf spring configuration, it ensures excellent load distribution and enhanced durability under demanding operational conditions. The system is designed for secure installation, providing reliable stability and performance for professional transport requirements.

Technical Specifications

Axle Type	2-axle
Suspension Type	Casting type with multi-leaf spring
Leaf Spring Dimensions	75mm x 13mm
Number of Leaves	10

Performance Features

Advantages	Heavy-duty construction, Load-bearing capacity, Corrosion resistance, High stability
