

Multi-Needle Chain Stitch Sewing Machine

This high-speed, multi-needle chain stitch sewing machine is designed for various applications in the garment, shoe, and accessories industries. The machine is engineered for efficiency and precision, capable of producing intricate stitch patterns on a wide range of materials.

Overview

High-Performance Chain Stitching

This high-speed, multi-needle chain stitch sewing machine is engineered for efficiency and precision in demanding production environments. Its robust construction ensures long-term durability, making it an ideal choice for the garment, shoe, and accessories industries. The machine supports versatile applications including hemming, attaching elastic, and creating intricate decorative stitching patterns.

Performance Features

Lubrication

Automatic Lubrication

Primary Applications

Hemming, Elastic Attachment, Decorative Stitching, Garment Manufacturing, Footwear Production

Technical Specifications

Feed Mechanism

Differential Feed

Stitch Length

Yes
