

Multi-Needle Computerized Embroidery Machine

This high-performance embroidery machine is designed for precision and efficiency. It features a multi-needle system that enables the use of multiple thread colors for creating intricate designs.

Product Overview

High-Performance Embroidery Solution

This multi-needle computerized embroidery machine is engineered for precision and high-volume commercial applications. It supports complex, multi-color designs through its advanced multi-needle system, ensuring efficiency and consistent quality. Equipped with an intuitive touchscreen interface, it streamlines pattern selection and machine operation for professional users.
