

Multi-Outlet Power Strip with Timer

This multi-outlet power strip includes a built-in timer. It enables users to schedule the power supply to the outlets, providing both convenience and energy savings.

Product Overview

Smart Energy Management

This multi-outlet power strip is designed to streamline power management for professional environments. Featuring six integrated AC outlets and a highly programmable timer, it enables automated power scheduling for connected devices. The unit is equipped with a master switch and status indicator lights to ensure safe and efficient operation while promoting energy conservation.
