

Multi-Outlet Power Strip with Timer

This power strip provides multiple electrical sockets for plugging in various devices. The timer dial enables scheduled on/off cycles for connected devices.

Product Overview

Smart Power Management

This multi-outlet power strip is designed to streamline your workspace or home environment by providing multiple electrical sockets in a single, convenient unit. Featuring an integrated timer dial, it allows for precise control over power delivery, enabling automated on/off cycles for connected devices. It is an ideal solution for managing energy consumption and ensuring devices operate only when needed.
