

Multi-Purpose Construction Vehicle

This multi-purpose vehicle combines the functions of a loader, excavator, and bulldozer. It is designed for digging, loading, and earthmoving operations with a front-end loader bucket and rear-mounted excavator arm.

Overview

Versatile Construction Solution

This multi-purpose construction vehicle is engineered to combine the core functions of a loader, excavator, and bulldozer into a single, efficient unit. Designed for versatility, it features a front-end loader bucket for material handling and a rear-mounted excavator arm for precise digging and trenching. Its robust build and powerful engine ensure reliable performance across demanding environments, making it an ideal choice for road construction, site preparation, and landscaping projects.

Capabilities

Suitable Applications

- Road construction
- Site preparation
- Landscaping

Primary Functions

Loading, Excavating, Bulldozing, Trenching, Earthmoving

Design

Key Design Features

Front-end loader bucket • Rear-mounted excavator arm • Robust construction
