

Multi-Purpose Construction Vehicle with Loader, Excavator, and Bulldozer Functions

This construction machinery combines the functionality of a loader, excavator, and bulldozer into a single versatile unit. It features a front-end loader bucket for material handling and a rear-mounted excavator arm for digging and trenching.

Overview

Versatile Multi-Function Construction Vehicle

This robust construction machine is engineered to maximize efficiency by combining the capabilities of a loader, excavator, and bulldozer into a single, high-performance unit. Featuring a front-end loader bucket for material handling and a rear-mounted excavator arm for precise digging and trenching, it is designed for demanding construction environments. With advanced hydraulic controls and a focus on operator comfort, this vehicle offers a durable and flexible solution for diverse excavation and site preparation tasks.

Technical Specifications

Key Features

- Front-end loader bucket
- Rear-mounted excavator arm
- Hydraulic control system
- Ergonomic operator cabin

Model Number	WZ30-25
Primary Functions	Loader, Excavator, Bulldozer
