

Multi-Purpose Mill and Drill Grinder

This multi-purpose grinder sharpens both mills and drills. It features easy operation and reduces costs with its dual functionality.

Product Overview

Professional multi-purpose grinding unit featuring precise angle adjustments and a robust frame.

Versatile Precision Grinding

This multi-purpose grinder is engineered for the efficient sharpening of both end mills and drill bits. Featuring a dual-function design, it reduces operational costs while maintaining high precision. With options for CBN or SDC abrasive wheels, it offers extended service life and consistent sharpening results for various flute configurations.

Key Advantages

Operational Benefits

- Dual-function design for both milling and drilling tools
- Supports 2, 3, 4, and 6-flute end mills
- Adjustable cutting lip, relief, and point angles
- Long service life with CBN or SDC wheel options
- Improved scrap removal and easier drilling/milling control

Technical Specifications

Performance Parameters

Parameter	End Mill	Drill Bit
Range	∅12-∅30MM	∅12-∅30MM
Point Angle	0°~5°	90°~135°

Power and Mechanical

220 V

Voltage

250 W

Power
