

Multi-Purpose Twin-Engine Helicopter

This multi-purpose helicopter is engineered for diverse operations, including troop transport, search and rescue, and cargo delivery. The twin-engine configuration enhances safety and performance, while the spacious cabin can be customized for specific mission requirements.

Overview

Versatile Multi-Purpose Helicopter

The CZ8 is a versatile multi-purpose helicopter engineered for a wide spectrum of operations. Featuring a robust design and advanced avionics, it is ideally suited for both military and civilian applications such as troop transport, search and rescue, and cargo delivery. Its twin-engine configuration provides enhanced safety and performance, while the modular cabin design allows for mission-specific configurations.

Performance & Design

Primary Applications

- Troop Transport
- Search and Rescue
- Cargo Delivery

Engine Configuration

Twin-engine

Key Operational Features

Advanced Avionics, Advanced Rotor System, Rugged Landing Gear, Modular Design

Maintenance

Maintenance Strategy

Modular design facilitates easy maintenance and upgrades, ensuring long-term operational readiness.
