

Multi-Speed Bicycle Freewheel

This multi-speed freewheel is designed for bicycles. It consists of varying sized sprockets that allow different gear ratios and coasting without pedaling.

Product Overview

High-Performance Multi-Speed Freewheel

This multi-speed bicycle freewheel is engineered for efficient power transfer and reliable performance across various terrains. Featuring a durable metal sprocket construction, it is designed to withstand the high-stress demands of active cycling. The integrated freewheel mechanism provides a smooth coasting experience, making it an essential component for high-quality bicycle drivetrains.

Technical Specifications

Component Type	Multi-Speed Bicycle Freewheel
Material	Durable metal
Key Features	Multi-speed design, Coasting capability, Durable construction, Efficient power transfer

Compatibility

Mounting	Standard central bore for compatible hubs
