

Multi-Speed Bicycle Freewheel Cog Set

This is a bicycle freewheel cog set designed for multi-speed bicycles. The cogs are constructed from durable metal for long-lasting performance and compatibility with standard bicycle hubs.

Product Overview

High-Performance Multi-Speed Transmission

This multi-speed bicycle freewheel cog set is engineered to provide smooth and reliable shifting across various terrains. Featuring a cluster of durable metal sprockets with varying tooth counts, it offers optimal gear ratios for both climbing and acceleration. The integrated freewheel mechanism enables effortless coasting, making it an ideal upgrade or replacement for standard multi-speed bicycle hubs.

Technical Specifications

Key Performance Features

- Integrated freewheel mechanism for coasting
- Multi-speed sprocket cluster
- Varying tooth ratios for versatile gear shifting
- High-durability metal construction

Component Type	Freewheel Cog Set
Material	Durable Metal

Compatibility

Application

Multi-speed Bicycles

Hub Compatibility	Standard freewheel bicycle hubs
