

Multi-Speed Three-Phase Asynchronous Motor

The multi-speed three-phase asynchronous motor is designed for applications requiring multiple speed settings. Its robust construction ensures reliable performance in demanding industrial environments.

Product Overview

Versatile Multi-Speed Performance

The YDT series multi-speed three-phase asynchronous motor is engineered for industrial applications requiring flexible speed settings. It provides reliable and consistent power delivery for manufacturing and automation machinery. With its robust construction and high-quality components, this motor ensures long-term durability and low maintenance requirements in demanding environments.

Technical Specifications

Insulation Class

Class B

Speed and Power Specifications

| Model | Power (kW) | Speed (r/min) | Pole |
|------------|------------|---------------|------|
| YDT90S-2/4 | 1.4/0.3 | 3000/1500 | 2/4 |

Rated Voltage

380 V

Frequency

50 Hz

Duty Cycle

Continuous operation
