

Multi-Spindle CNC Automatic Lathe

This automatic lathe is designed for precision machining of small parts. It features a multi-spindle configuration for high throughput and efficient material removal.

Overview

Precision Machining Solutions

This multi-spindle CNC automatic lathe is engineered for high-throughput precision machining of small components. Designed for versatility, it handles a wide array of materials including metals, plastics, and composites, making it an ideal choice for high-volume production environments. Its compact, robust architecture ensures long-term reliability and minimal maintenance requirements across electronics, medical, and automotive sectors.

Technical Specifications

Compatible Materials

- Metals
- Plastics
- Composites

Integrated Systems

Integrated Coolant System • Advanced CNC Controls

Machining Capabilities

Multi-Spindle, CNC Control, Automatic Bar Feeding, Programmable Tool Offsets

Applications

Target Industries

- Electronics
- Medical Devices
- Automotive
