Product Overview

High-Performance SUV Alloy Wheels

These multi-spoke alloy wheels are specifically engineered for 4X4 and SUV applications, offering a perfect balance of strength and lightweight construction. The precision-engineered design enhances vehicle aesthetics while improving brake cooling and handling performance. Manufactured to stringent quality standards, these wheels provide long-lasting durability and reliability for demanding driving conditions.

Technical Specifications

Available Sizes

17 INCH • 18 INCH • 19 INCH • 20 INCH

Fitment Precision

139.7 mm

PCD Standard

PCD Configurations

5-139.7, 6-139.7, 8-139.7

Design & Performance

Key Performance Features

- Multi-spoke design for improved brake cooling
- Lightweight alloy construction for reduced unsprung weight
- Two-tone finish with dark metallic base and silver accents
- Precision engineered for superior handling

Primary Application

4X4 and SUV Vehicles
