

Multi-Spoke Alloy Wheel

This high-performance alloy wheel enhances vehicle aesthetics and handling. It is constructed from durable alloy material, ensuring strength and resistance to corrosion, with a maximum load weight of 3500lbs.

Overview

High-Performance Multi-Spoke Alloy Wheel

This high-performance alloy wheel is designed to enhance both vehicle aesthetics and handling through its precision-engineered multi-spoke design. Constructed from durable alloy material, it offers superior strength and resistance to corrosion, making it suitable for a wide range of vehicle types. The modern, aggressive look is achieved through a contrasting black and silver finish, ensuring your vehicle stands out while maintaining optimal balance and performance.

Technical Specifications

Available Sizes

- 16 inch
- 17 inch
- 18 inch
- 19 inch
- 20 inch

PCD Configurations

5/6/8*114.3-139.7, 139.7-150, 165.1-180

Design & Build

Finish

Black • Silver • Contrasting Tones

Material

Durable Alloy

Design Style

Multi-Spoke

Performance

Key Performance Features

- Enhanced vehicle handling
- Corrosion resistance
- Precision-engineered balance
- Optimal fitment
