

Multi-Spoke Aluminum Alloy Wheel

This alloy wheel features a multi-spoke design and a deep concave profile. It is constructed from lightweight aluminum alloy for enhanced strength and reduced unsprung weight, with a maximum load weight of 620KG.

Product Overview

High-Performance Multi-Spoke Alloy Wheel

This multi-spoke aluminum alloy wheel is engineered for both aesthetic appeal and enhanced vehicle performance. Featuring a lightweight construction, it reduces unsprung weight to improve handling and responsiveness. The deep concave profile and contrasting finish provide a modern, aggressive look suitable for a wide range of automotive applications.

Technical Dimensions

Available Sizes

- 14 inch
- 15 inch
- 16 inch
- 17 inch
- 18 inch

PCD Range

4*100-120, 5*100-120

Design & Aesthetics

Accents

Red center cap bolts

Design Style

Multi-spoke with deep concave profile

Finish

Contrasting black and silver

Material & Construction

Performance Benefits

- Lightweight construction
- Reduced unsprung weight
- Enhanced vehicle handling
- Improved strength

Material

Aluminum Alloy
