

Multi-Spoke Lightweight Alloy Wheel

This high-performance alloy wheel features a multi-spoke design with a gold finish and a polished silver lip. It is constructed from lightweight alloy for enhanced vehicle dynamics and aesthetics.

Product Overview

High-Performance Alloy Wheel

This multi-spoke lightweight alloy wheel is engineered for superior vehicle dynamics and aesthetic appeal. Utilizing advanced low-pressure casting, the design ensures high material density, enhanced corrosion resistance, and exceptional mechanical properties. The wheel features a reinforced rim stiffener and a thickened bottom edge, providing robust impact resistance and long-term structural integrity for professional automotive applications.

Construction & Engineering

Structural Features

- 360° balanced stress distribution
- Thickened bottom edge
- Rim stiffener design

Manufacturing Process

Low pressure casting

Compliance & Certification

Quality Certifications

VIA, JWL, KBA 49885
