

Multi-Stage Air Purification System with Digital Display

This air purification system removes pollutants and allergens from indoor environments. It features multi-stage filtration, capturing dust, pollen, pet dander, smoke, and odors.

Product Overview

Advanced Air Purification

The GL-3190 is a sophisticated air purification system engineered to significantly improve indoor air quality. Utilizing a comprehensive multi-stage filtration process, it effectively captures common pollutants including dust, pollen, pet dander, smoke, and various odors. Designed for versatility and ease of use, the unit features an intuitive digital display for real-time monitoring and control, making it an ideal solution for maintaining healthier environments.

Technical Specifications

Model Number	GL-3190

Features

System Highlights

- Multi-stage filtration technology
- Integrated digital air quality display
- Compact design for various spaces
- Optimized for quiet operation

Filtration Targets	Dust, Pollen, Pet Dander, Smoke, Odors
