

Multi-Station Plate Making and Printing Machine

This plate making and printing machinery is designed for efficient and precise printing processes. The machine features a multi-station configuration, allowing for simultaneous plate making and printing operations.

Overview

High-Efficiency Printing Solution

This multi-station plate making and printing machine is engineered for precision and high-speed operation in professional printing environments. It features a robust frame for maximum stability and an integrated control panel for real-time monitoring and adjustment of printing parameters. Designed for versatility, it is an ideal solution for producing high-quality labels, packaging, and promotional materials.

Technical Features

Web Handling Systems

- Multiple rollers
- Tension control system

Configuration

Multi-station

Control System

Digital Control Panel, Parameter Monitoring, Adjustable Settings

Safety and Build

Safety Features

Operator Protection • Equipment Safeguards

Construction

Robust frame for high-speed stability

Applications

Primary Applications

- Labels
- Packaging
- Promotional materials
