

# Multi-Story Interphone and Paging System

This system enables both interphone and paging functionalities. It supports video and audio communication between the outdoor station and the indoor monitors.

## System Overview

### Professional Multi-Story Interphone and Paging Solution

This advanced interphone and paging system is engineered specifically for multi-story residential or commercial buildings. It facilitates seamless audio and video communication between outdoor entry points and indoor monitors across multiple levels. Designed for reliability, the system integrates essential components like video amplifiers, electric lock controls, and robust power management to ensure secure and efficient building access.

## Technical Specifications

### Power Supply Options

**12 V**

Standard DC Input

**18 V**

High-Voltage DC Input

### Compatible Wiring Types

SYV75-5, RVV5X0.3, RVVnX0.12, RVV2X1.0, 6P RVVP-6X1.0

## System Components

### Core Components

- Outdoor Station
- Indoor Monitors
- Video Amplifiers
- Electric Lock Control
- Network Center Connection

### Floor Range

1st to 8th Floor
