

Multi-Surface Robotic Vacuum Cleaner

This model features four cleaning functions: sweep, vacuum, dry mopping, and sterilize. It handles surfaces such as hardwood, tile, linoleum, and low-pile carpets, and its sensors prevent it from getting stuck.

Overview

Intelligent Multi-Surface Cleaning

This advanced robotic vacuum cleaner offers a comprehensive 4-in-1 cleaning solution, designed to sweep, vacuum, dry mop, and sanitize floors in a single pass. Engineered for efficiency, it features smart navigation with cliff and anti-collision sensors, ensuring it safely cleans around furniture and avoids stairs. With its integrated UV lamp for disinfection and HEPA filtration, this cleaner provides a deeper, healthier clean for any living environment.

Key Features

Smart Features

- Virtual Wall detector for area restriction
- Automatic recharging when power is low
- On-board scheduling for up to 7 sessions per week
- Anti-collision and cliff detection sensors

Cleaning Functions

Sweep, Vacuum, Dry Mop, Sterilize, UV Disinfection

Technical Specifications

Performance Metrics

24 W Power	14.4 V Voltage	2200 mAh Battery Capacity	50 dB Noise Level
----------------------	--------------------------	-------------------------------------	-----------------------------

Runtime & Charging

Metric	Value
Working Time	90-150 min
Charging Time	3-4 hours

Operating Environment

- Working Temp: -10°C to 45°C
- Working Humidity: d85RH

Certifications & Compliance

Certifications

CE • EMC • RoHS
