

Multi-Temperature Zone Refrigerator

This refrigerator features a multi-temperature zone design to keep food fresh. It has a soft freezing function for meat and poultry, making it easier to slice and thaw.

Product Overview

Professional Multi-Temperature Preservation

This multi-temperature zone refrigerator is engineered for optimal food preservation, featuring specialized compartments for meat soft-freezing and moisture-balanced fruit storage. Built with a high-efficiency compressor and R600a fluorine-free refrigerant, it combines advanced cooling performance with national level one energy efficiency. The unit is constructed with high-density micro-pore foam insulation for superior energy conservation and a durable, sleek design that fits modern commercial or residential kitchens.
