

Multi-Tier Chocolate Fountain with Heated Base

This multi-tiered chocolate fountain is designed to create cascading chocolate displays. It features a heated base with a rotary dial for temperature control and includes a stainless steel basin and food-grade plastic tiers.

Overview

Professional Multi-Tier Chocolate Fountain

This multi-tier chocolate fountain is designed to create a captivating cascading display for parties, events, and dessert presentations. It features a heated base with a rotary dial for precise temperature control, ensuring chocolate remains perfectly molten. The system utilizes an internal auger to draw chocolate up a central column, allowing it to flow elegantly over food-grade plastic tiers into a durable stainless steel basin.
