

Multi-Tier Shelving Unit

This multi-tiered shelving unit is designed for storage and organization. Constructed from durable materials, it is suitable for various storage applications in warehouses, workshops, or retail environments.

Overview

Versatile Multi-Tier Storage Solution

This multi-tier shelving unit features a simple, robust structure designed for easy accessibility in daily warehouse and workshop environments. The system offers high flexibility, allowing users to adjust shelf heights and add or remove laminate floors to meet specific storage requirements. Engineered for reliability and longevity, it utilizes a premium surface treatment process to ensure excellent anti-oxidation performance.

Design & Construction

Estimated Service Life

10 Years

Service Life
