

Multi-Tiered Bottled Water Storage Rack

This multi-tiered rack is designed for storing multiple bottled water containers. Constructed from durable metal, it provides a sturdy and space-saving storage solution.

Product Overview

Professional Storage Solution

This multi-tiered bottled water storage rack is designed to meet modern industrial and commercial storage requirements. Featuring a robust steel construction, it maximizes space utilization by allowing for vertical stacking up to three layers. Its smart design includes forklift-compatible hooks at the base, ensuring both operational efficiency and a professional, organized aesthetic.

Technical Specifications

Material	Steel
Stacking Limit	3 layers
Country of Origin	China

Key Features

Core Advantages

- Space-saving multi-tiered design
- Forklift-compatible base for easy transport
- High load-bearing capacity
- Clear visibility for inventory management
- Simple and durable structure

Design Highlights	Stackable, Forklift Accessible, Space-Efficient, Professional Grade
