

Multi-Tiered Chocolate Fountain

This multi-tiered chocolate fountain is designed for continuous cascading of melted chocolate. It features a stainless steel base with a heating element and a rotating auger system.

Product Overview

Professional Multi-Tiered Chocolate Fountain

This multi-tiered chocolate fountain is engineered for continuous cascading of melted chocolate, creating an elegant centerpiece for parties, events, and dessert displays. Featuring a durable stainless steel base and a rotating auger system, it ensures a smooth and reliable flow from the base to the top tier. The unit is designed for ease of use with food-grade materials, simple assembly, and straightforward cleaning for professional hospitality environments.

Technical Specifications

Performance Metrics

100 W

Power Consumption

Model	CFG-002
Operating Voltage	220V-240V

Design & Construction

Materials	Stainless Steel Base, Food-Grade Materials, Durable Construction
Drive System	Rotating auger system

Operational Features

Control Interface

- Temperature control knob
- Power indicator light
- Integrated heating element

Maintenance & Assembly

Easy to Assemble • Easy to Disassemble • Easy to Clean

Applications

Ideal For

- Parties
- Events
- Dessert Displays
