

Multi-Unit Intercom System with Call Buttons

This intercom system is designed for apartment and office buildings. It features individual call buttons for each unit and two-way communication.

Product Overview

Professional Multi-Unit Intercom System

This multi-unit intercom system is specifically engineered for apartment complexes and office buildings requiring reliable access control. Featuring individual call buttons for each unit, it allows visitors to communicate directly with specific residents or employees via high-quality two-way audio. The system is housed in a durable metal casing, ensuring longevity and security in high-traffic environments.
