

Multi-Wire Connection Cable with Rectangular Connector

This multi-wire connection cable is suitable for automotive and electronic applications. It includes a rectangular connector with multiple pins and a blue seal for environmental protection.

Product Overview

Reliable Multi-Wire Connectivity

This multi-wire connection cable is engineered for robust performance in automotive and electronic circuit applications. Featuring a secure, weather-resistant rectangular connector with a protective blue seal, it ensures reliable power and signal transmission. The assembly includes multi-colored insulated wiring designed for clear identification and organized integration into complex electrical systems.

Technical Specifications

Connector Features

- Rectangular form factor
- Multi-pin configuration
- Integrated blue environmental seal
- Secure locking mechanism

Wiring Configuration

- Multi-conductor assembly
- Color-coded insulation (Yellow, Black, Red)
- High-durability insulation

Primary Applications

Automotive, Electronic Circuits, Power Transmission, Signal Transmission
