

Multifunction Portable Jump Starter with Air Compressor and Inverter

This multifunction jump starter provides emergency power for vehicles with discharged batteries. It also features an integrated air compressor, DC/AC inverter, and work light.

Overview

All-in-One Emergency Power Solution

This multifunction portable jump starter is designed to be the ultimate emergency companion for vehicle owners. It combines essential roadside assistance tools, including a powerful jump starter, an integrated air compressor, and a versatile 400W inverter for DC/AC power output. Built for reliability, this unit also features an emergency light and a 3-stage charger, ensuring you are prepared for battery failures, low tire pressure, or the need for portable electricity in any situation.

Technical Specifications

Inverter Power Output	400 W
Charger Voltage	12 V
Charger Current	0.75 A

Features

Charging Technology	3-Stage Charging
Core Functions	Jump Starter, Air Compressor, Emergency Light, DC/AC Inverter
