Product Overview

Multifunctional Entertainment System

This portable wireless speaker integrates a 14.1-inch HD LCD screen, offering a versatile solution for both audio and video playback. Designed for flexibility, it supports a wide range of media formats via USB and TF slots, while providing seamless connectivity through Bluetooth and screen mirroring for iOS and Android devices. With a built-in rechargeable 6000mAh battery and included wireless microphone, it is an ideal choice for mobile presentations, outdoor events, and portable entertainment.
