

Multifunction Welding Workstation

This welding workstation is designed for single-operator use and supports multiple welding processes. It utilizes advanced full bridge dephasing soft switch technology with DC-AC.

H500

Product Overview

Professional H500 Welding Workstation

The H500 Welding Workstation is a robust and versatile solution engineered for demanding industrial welding environments. It features a user-friendly control interface with precise digital displays for real-time monitoring of amperage and voltage settings. With its compact footprint and integrated cooling architecture, this workstation offers stable, high-performance operation while ensuring a long service life for your equipment.

Technical Features

Control Interface	Digital Displays, Adjustable Amperage, Adjustable Voltage
Thermal Management	Yes
Output Connectivity	Multiple output sockets for accessory flexibility

Design and Build

Build Quality

Robust • Durable • Compact Design

Operational Stability	Sturdy base for secure operation
