

Multifunction Windshield Wiper Blade

This multifunction soft wiper blade ensures optimal visibility in various weather conditions. Its aerodynamic design reduces wind lift and noise, providing a smooth and quiet wiping performance.

Product Overview

High-Performance Multifunction Wiper Blade

This multifunction soft wiper blade is engineered to ensure optimal visibility in diverse weather conditions. Featuring an aerodynamic design, it effectively reduces wind lift and noise to deliver a smooth, quiet wiping performance. The flexible spine is designed to conform precisely to the windshield's curvature, maintaining consistent contact pressure across the entire wiping area for superior durability and wear resistance.

Key Features

Performance Benefits

- Aerodynamic design minimizes wind lift and noise
- High-quality rubber construction for extended durability
- Flexible spine ensures consistent contact pressure
- Universal adapter system for broad vehicle compatibility

Installation

Installation Method	Universal adapter system
