

Multifunctional Electric BBQ Grill with Hot Pot

Multifunctional electric barbecue grill with integrated hot pot features independent temperature controls. It includes a non-stick grill surface and a separate compartment for soup or stew.

Product Overview

Versatile Culinary Solution

This multifunctional electric appliance seamlessly combines a barbecue grill with an integrated hot pot, perfect for versatile cooking needs. It features independent temperature controls for both the grill and the hot pot sections, allowing for precise heat management during meal preparation. Designed with convenience in mind, the unit includes a non-stick surface for easy grilling and a dedicated compartment for soups or stews.
