

# Multifunctional Woodworking Station

This versatile woodworking station is designed for planing, milling, and moulding wood. Built with high-quality materials, it ensures durability and consistent performance for various wood processing tasks.

## Overview

### Professional Woodworking Station

The WM2000 is a compact and lightweight multifunctional woodworking station designed for efficient planing and sawing tasks. Engineered for versatility, it features adjustable planing depth, protective safety guards, and built-in overload protection to ensure reliable operation. This machine offers a robust solution for professional wood processing, combining essential woodworking capabilities into a single, space-saving unit.

## Performance Metrics

### Rated Input Power

**2 kW**

Input Power

**5500 revs/min**

Idle RPM

### Working Mode

S6-40

## Planing Specifications

### Planing Capacity

Metric	Value
Max. One-way Thickness	200 mm
One-way Depth	0-3 mm
Max. Thickness (with clamping)	200 mm

### Knife Configuration

- Quantity: 2 pcs
- Length: 200 mm
- Resharpenable blades

## Sawing Specifications

### Sawing Capabilities

- Max. Sawing Depth: 70 mm
- Rated Saw-blade Diameter: 210 mm
- Cutting/Planing Angle Range: 0-45 degrees

## Dimensions and Weight

### Physical Dimensions

Component	Dimensions (L x W)
Saw Table	710 x 500 mm
Planing Table (Mobile/Immobile)	700 x 220 mm
Packing Size	86 x 52 x 25 cm

### Weight

**43 kg**

Net Weight

**56 kg**

Gross Weight

## Safety and Compliance

### Safety Features

Overload Protection, Protective Guards, Adjustable Depth Control
